

## Overview

Making the right healthcare decision is important when it comes to not only treatment, but also location and cost. The AMPS Care Navigation team is a resource for you when you need guidance and access to healthcare.

## Find a Provider

The AMPS Care Navigation team, in collaboration with you, uses the Provider Finder to locate a “friendly” provider for medical care, based on cost, quality, location and prior utilization. This includes a variety of healthcare providers such as primary care and specialty physicians, surgery centers, lab locations and imaging centers.

## Steer to Savings

When you are in need of care and assistance in finding a provider, call the number on the back of your ID card and ask to speak with a Care Navigator. Keep in mind, using a Care Navigator to locate a provider is completely optional; however, this service will guide you to providers offering the best value, which will lower your out-of-pocket cost.

## Schedule an Appointment

For elective, non-emergent procedures, the AMPS Care Navigation team can help schedule you with providers that are directly contracted to offer transparent, bundled pricing on planned elective medical procedures – such as knee and hip replacements, MRIs, and colonoscopies. This service provides additional savings due to these procedures being performed at ambulatory surgery centers, independent imaging facilities and GI centers versus a high-cost hospital setting for non-emergent care.

50% Saved on an MRI Scan

Real Savings when you schedule with a Care Navigator!
